EDUCATION

Ort Braude – Braude Academic College of Engineering

| 2020 – 2025

BSc Software Engineering – Graduate

PORTFOLIO & SKILLS

KYC/AML Automation: Integrated Sumsub API & SDK for advanced KYC flows.

Travel Rule Compliance: Designed and built a fully compliant FATF Travel Rule flow, enabling secure transaction verification and wallet ownership checks via Sumsub endpoints.

Risk Engine: Developed a modular, configurable risk scoring system, visualized in a custom admin panel, based on geo, IP, transaction history, and adverse media.

Fiat On-Ramp Integration: Connected Transak fiat-to-crypto services with localized KYC and live transaction status tracking.

Admin Tools: Built React-based configuration interfaces for managing verification thresholds, provider flows, and transaction policies using Meteor methods.

Crypto Monitoring: Created real-time dashboards with risk tagging, explorer integration, and tools.

Secure Admin Actions: Enforced 2FA-secured admin operations with role-based access for sensitive actions like email updates and KYC overrides.

SDK & Config Management: Delivered reusable WebSDK components.

Research – Anomaly Detection: anomaly detection in graphs using GAE and DDPM.

Encryption System: A combination of SALSA20, RSA and EC Elgamal on data.

Managing drinking machine app, Minefield game, Kid's playground, Restaurant menu, Student management system, Searching by MDP, Digress-analyze patterns from large datasets, RTD.

Soft Skills: Problem-solving, Communication, Teamwork, Attention to details, Prioritization.
