Summary

Full-Stack Software Engineer with hands-on experience building and scaling web applications, fintech platforms, and business-focused digital products.

Experienced in React, Node.js, MongoDB, and modern web technologies, with a strong background in designing end-to-end solutions from concept to production.

Built and launched commercial products, developed compliance and risk-management systems for fintech environments, and collaborated directly with stakeholders to translate business needs into technical solutions. Combines strong technical execution with product thinking, user-focused development, and a practical understanding of business growth.

Technical Skills

Languages: **JavaScript, TypeScript, Python, C, C#**

Frontend: **React, Tailwind CSS, Ant Design, HTML5, CSS3**

Backend: **Node.js, Express.js, Meteor, REST APIs**

Databases: **MongoDB, SQL**

Blockchain & FinTech: **Web3, Wallet Integrations, Fiat On/Off Ramps, Transaction Monitoring**

Security & Compliance: **KYC, AML, FATF Travel Rule, RBAC, 2FA**

Tools: **Git, CI/CD, Docker, SEO Optimization, Automation Tools**

Experience

WhatsNew.co.il, Founder & Lead Full-Stack Engineer | **2024 - Present**

Designed, developed, and launched a production-ready coupon and deals platform from the ground up. Built and maintained the entire technology stack, including frontend, backend, database architecture, SEO infrastructure, and automation systems. Developed scalable deal management and content workflows focused on user experience and organic growth. Implemented performance optimizations, real-time updates, and search functionality. Led product planning, feature prioritization, and technical decision-making based on user behavior and analytics.

PlasBit, Full Stack & Blockchain Engineer | **2024 - 2025**

Developed backend services and user-facing applications for a cryptocurrency payment platform. Implemented KYC and AML verification processes using Sumsb APIs and SDKs. Designed and built a FATF Travel Rule compliance solution for secure transaction verification. Developed a configurable transaction risk-scoring engine using geolocation, IP intelligence, transaction history, and adverse media analysis. Built secure administration tools with role-based permissions and 2FA-protected actions. Integrated fiat on-ramp services and implemented real-time transaction monitoring.

R & R - Net, Freelance FullStack Developer | **2023 - 2024**

Delivered custom web applications and business websites for small and medium-sized businesses. Managed projects end-to-end, from requirements gathering and design to deployment and maintenance. Improved SEO performance, page speed, and overall user experience. Worked directly with business owners to transform operational requirements into scalable software solutions. Selected Projects:

Education

Ort Braude Braude Academic College of Engineering | **2020 - 2025**

BSc Software Engineering, Graduate

Research Experience Graph anomaly detection using Graph Autoencoders (GAE) and Diffusion Models (DDPM).

Languages: Hebrew – Native | English – Professional (speaking, reading, writing)
