Summary

Full-Stack Engineer with 5+ years of hands-on experience building production grade web and fintech platforms. Strong background in React, Node.js, MongoDB, and blockchain-based systems, including KYC/AML compliance, risk engines, and real-time dashboards. Proven ability to take products end-to-end with a strong focus on scalability, security, and business impact.

Code Technologies

Languages: **JavaScript, TypeScript, Python, C, C#, Asm**

Frontend: **React, Tailwind CSS, Ant Design**

Backend: **Node.js, Meteor, REST APIs**

Databases: **MongoDB, IndexedDB, SQL**

Blockchain & FinTech: **Web3, wallets, fiat on-/off-ramps, crypto monitoring**

Security & Compliance: **KYC/AML, Sumsb, FATF Travel Rule, 2FA, RBAC**

Tools: **Git, CI/CD, Netlify, SEO & automation tools**

Experience

WhatsNew.co.il, Lead Full-Stack Engineer (Founder-Led Product) | **Present**

Designed, developed, and launched a production-scale coupons and deals platform. Built the full system end-to-end: frontend, backend, database, SEO, and automation. Implemented real-time deal updates and performance optimizations focused on scalability and UX. Led architectural decisions and product iteration based on user growth and analytics.

PlasBit, Full Stack & Blockchain Engineer | **2025**

Developed backend services and user interfaces for a blockchain-based crypto payment platform. Implemented KYC/AML flows using Sumsb API & SDK. Designed and built a FATF-compliant Travel Rule solution for transaction verification. Built a configurable risk-scoring engine based on geo, IP, transaction history, and adverse media. Created secure admin dashboards with role-based access and 2FA-protected actions. Integrated fiat on-ramp services (Transak) with live transaction tracking.

Tech: React, Node.js, Meteor, MongoDB, Tailwind, Ant Design

R & R – Net, Freelance Full-Stack Developer | **2023 – 2024**

Delivered end-to-end web solutions for small businesses, from design to production. Focused on performance, SEO optimization, and maintainable architectures. Worked directly with clients to translate business requirements into technical solutions.

Selected Projects:

QRScanner: Screenshot-based QR scanning service (Microservices, jsQR).

BTS, Blockchain Trading System (Demo): Cryptocurrency trading simulator.

Medical Clinic Website: Secure contact flows and deployment.

Education

Ort Braude Braude Academic College of Engineering | **2020 – 2025**

BSc Software Engineering, Graduate

Research Experience Graph anomaly detection using Graph Autoencoders (GAE) and Diffusion Models (DDPM).

Additional Background

Capital Market Introduction Course - Meitav Dash | **2020**

Blockchain and Cryptocurrencies Expert | **2017 – 2025**

Languages: Hebrew – Native | English – Professional (speaking, reading, writing)
